FULL STACK DEVELOPER

I am a highly skilled web developer with over **2 years of experience** in **HTML, CSS, JavaScript/TypeScript, Java, PHP, Python**. I have knowledge of popular frameworks such as **ReactJS, ReactNative, Django, Laravel, JavaSpring-Boot** and experience with **REST APIs and MVC frameworks**.

TECHNICAL SKILLS

Languages	: JavaScript, TypeScript, PHP, Java, HTML, CSS, TailWind CSS
Frameworks	: React.JS, React Native, Express, Node.js, NextJs
Libraries	: Material, Redux, React Router
Databases	: MongoDB, PostgreSQL, MySQL
Tools	: Git, GitHub, Docker, AWS

EXPERIENCE

Software Engineer

Neptune Technology

Apr 2021 – May 2023

Yangon, Myanmar

- Developed and maintained full-stack web applications using **React.JS, Java (Spring Boot), and MySQL** ensuring smooth internal business operations.
- Designed and implemented **RESTful APIs** for data processing, authentication, and integration with third-party services, leveraging **JWT for authentication** and **Redis** caching for optimized data retrieval.
- Integrated backend services with **React.js** and **React Native frontends**, implementing asynchronous data handling and real-time updates with **WebSockets**.
- Translated Figma designs into responsive, production-ready user interfaces using **React.JS and Tailwind CSS** and implemented client-side form validation and state management with **Redux**.
- Collaborated in an **Agile team**, participating in sprint planning, code reviews, and feature deployments, using Git for version control and CI pipelines for automated deployment.

Software Engineer Internship

BizLeap Technology

Feb 2019 – May 2019

Yangon, Myanmar

- Assisted in developing HR management software features including employee profiles, leave tracking, and payroll modules, using **Java and SpringBoot** for functionality.
- Created **high-fidelity UI/UX designs** in **Adobe XD** and translated them into responsive, functional frontend components.
- Wrote and executed **unit tests** with **JUnit** to improve software reliability and reduce production bugs.
- Supported **database design and optimization** using MySQL, implementing normalized schema and efficient queries.

EDUCATION

University of Sydney

Master of Computer Science

Camperdown, NSW, Australia

Feb 2024 – Expected in March 2026

Coventry University

Bachelor of Honors in Computing

Coventry, United Kingdom

2019 – 2022

PROJECTS

Earthquake Rescue Simulation Platform

Node.js, Next.js, TypeScript, Figma, OpenStreetMap

[Source Code](#)

- Built and deployed a **cloud-based disaster response simulation platform** for real-time rescue route planning.
- Integrated mapping services using **OpenStreetMap** for location-based emergency coordination.
- Open-sourced the project on **GitHub** to support collaboration and community contributions.

Ping Pong Ball Game

C#, Unity

- Designed and programmed an **interactive 2D game** where players keep a ball within boundaries.
- Implemented **game physics** and a **scoring system** to enhance player engagement.

Weather App

React, REST API, OpenWeatherMap

- Developed a **responsive weather application** using React and REST APIs.
- Integrated **OpenWeatherMap API** to display real-time forecasts.
- Designed a clean and accessible user interface for **fast data visualization**.
